BRITISH MEDICAL BULLETIN

VOLUME SIXTEEN
1960

Advisory Editor
SIR WILLIAM Mac ARTHUR

*

ANTIBIOTICS IN MEDICINE
Scientific Editor . . LAWRENCE P. GARROD

*

THE THYROID GLAND
Scientific Editor . . . . . N. B. MYANT

*

INSULIN
Scientific Editor . . . . . F. G. YOUNG

MEDICAL DEPARTMENT · THE BRITISH COUNCIL · 65 DAVIES STREET · LONDON · W.1

CONTENTS OF VOLUME SIXTEEN

NUMBER 1. *Antibiotics in Medicine*

Scientific Editor: LAWRENCE P. GARROD

		PAGE
Introduction	*Lawrence P. Garrod*	1
Chemistry and classification of antibiotics	*E. P. Abraham & G. G. F. Newton*	3
The nature of the selective toxicity of antibiotics	*E. F. Gale*	11
Drug resistance and mechanisms for its development	*M. R. Pollock*	16
The principles of therapeutic use of antibiotics	*Lawrence P. Garrod & E. F. Scowen*	23
The laboratory control of antibiotic therapy	*J. C. Gould*	29
The pharmacology of antibiotics	*J. M. Robson & G. A. H. Buttle*	35
The rationale and management of combined therapy	*B. W. Lacey*	42
Book Reviews		85
Preventive use of antibiotics in medicine	*E. G. L. Bywaters*	47
Preventive use of antibiotics in surgery	*Gerard W. Taylor*	51
The chemotherapy of tuberculosis, with special reference to patients whose bacilli are resistant to the standard drugs	*John Crofton*	55
The treatment of bacterial endocarditis	*A. Eric Dormer*	61
The dangers of antibiotic treatment	*D. M. Dunlop & J. McC. Murdoch*	67
Clinical problems of drug-resistant pathogens	*E. J. L. Lowbury*	73
Laboratory uses of antibiotics	*Robert Cruickshank*	79
The search for new antibiotics	*A. H. Campbell*	82
Notes on Contributors		87

NUMBER 2. *The Thyroid Gland*

Scientific Editor: N. B. MYANT

Introduction	*Sir Charles Harington*	89
The association of deafness with thyroid dysfunction	*W. R. Trotter*	92
Types of thyroid growth	*I. Doniach*	99
Genesis of the thyroid nodule	*Selwyn Taylor*	102
Use of radioactive iodine in the diagnosis of thyroid disorders	*A. W. G. Goolden*	105
Sporadic goitrous cretinism	*E. M. McGirr*	113
Biosynthesis of the thyroid hormones	*Rosalind Pitt-Rivers*	118
Influence of the thyroid on the central nervous system	*J. T. Eayrs*	122
Notes on Contributors		170
Thyroid-stimulating hormone	*H. D. Purves & D. D. Adams*	128
Naturally occurring goitrogens	*F. W. Clements*	133
Thyroid hormones and plasma lipids	*G. S. Boyd & M. F. Oliver*	138
Transport of thyroid hormones	*J. R. Tata*	142
Genetic factors in thyroid diseases	*F. D. Kitchin & W. Howel Evans*	148
Thyroid auto-immunity	*I. M. Roitt & Deborah Doniach*	152
The passage of thyroid hormone from mother to foetus and its relation to foetal development	*C. Osorio & N. B. Myant*	159
The hypothalamus and the thyroid gland	*K. Brown-Grant*	165
Book Reviews		172

NUMBER 3. *Insulin*

Scientific Editor: F. G. YOUNG

Introduction: Insulin and diabetes	*F. G. Young*	175
Forty years of interest in insulin	*Charles H. Best*	179
Chemistry of insulin	*F. Sanger*	183
The chemistry of pituitary polypeptide hormones	*Ieuan Harris*	189
Methods of insulin assay	*G. A. Stewart*	196
Metabolism of peptide hormones	*A. J. Kenny*	202
Insulin in blood	*P. J. Randle & K. W. Taylor*	209
Insulin antagonists	*J. Vallance-Owen*	214
Insulin antibodies	*P. H. Wright*	219
Notes on Contributors		260
The action of insulin on carbohydrate metabolism	*R. B. Fisher*	224
Insulin and metabolism of fatty acids	*S. J. Folley & A. L. Greenbaum*	228
Insulin and protein metabolism	*A. Korner & K. L. Manchester*	233
The mechanism of action of insulin	*P. J. Randle & F. G. Young*	237
Endocrine disorders and insulin action	*Russell Fraser*	242
Insulin in clinical practice	*Wilfrid Oakley*	247
Chemistry of hypoglycaemic substances other than insulin	*R. F. Mahler*	250
Clinical effectiveness of insulin substitutes	*J. D. N. Nabarro*	255
Book Reviews		262

INDEX TO VOLUME SIXTEEN

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

ABRAHAM, E. P. & NEWTON, G. G. F.: Chemistry and classification of antibiotics, 3
Actinomycins, chemistry, 5
— pharmacology, 40
ADAMS, D. D., *see* PURVES, H. D., 128
Adrenocorticotropic hormone, 191
Albert, A.: *Heterocyclic chemistry*, 85
Amphotericin, chemistry, 7
Amphotericin B, pharmacology, 40
Animal experiments: *Achievement: some contributions of animal experiment to the conquest of disease*, 263
Antibiotics: *Biochemistry of antibiotics: Proceedings of Fourth International Congress of Biochemistry*, Vol. V, Symposium V, 86
— chemistry, 3
— choice for therapeutic use, 23
— classification, 3
— laboratory uses, 79
— pharmacology, 35
— prophylactic use, drawbacks, 48
— — — hazards, 48
— — — in burns, 52
— — — in rheumatic disease, 49
— — — in surgery, 51
— — — indications, 47
— search for new substances, 82
— sensitivity tests, 30, 31
— surface-active, action, 13
— therapeutic use, 23
— — — accessory factors, 27
— — — dangers, 67
— — — duration of treatment, 26
— — — in bacterial endocarditis, 61
— — — in tuberculosis, 55
— — — laboratory control, 29
— — — rationale and management of combined therapy, 42
— toxicity, selective, 11
— use in isolation of viruses, 80
Azaserine, pharmacology, 40
L-Azaserine, 3

Bacitracin, chemistry, 5
— dangers of use, 70
— pharmacology, 40
Bayliss, L. E.: *Principles of general physiology*, vol. 1, 5th ed., 172
Benzylpenicillin, pharmacology, 35
BEST, C. H.: Forty years of interest in insulin, 179
Biguanides, chemistry, 251
Biochemistry: *Biochemistry in relation to medicine*, 3rd ed., 264
— *Data for biochemical research*, 263
Biographical notes on contributors, 87, 170, 260
Book reviews, 85, 172, 262
BOYD, G. S. & OLIVER, M. F.: Thyroid hormones and plasma lipids, 138
British Pharmaceutical Codex 1959, 173
Broom, W. A., Wolff, F. W. & Young, F. G. (editors): *Mechanism of action of insulin*, 262
BROWN-GRANT, K.: The hypothalamus and the thyroid gland, 165
Brunner, R., *see* Spitzy, K. H., 86
Burns, antibiotic prophylaxis, 52
BUTTLE, G. A. H., *see* ROBSON, J. M., 35
BYWATERS, E. G. L.: Preventive use of antibiotics in medicine, 47

CAMPBELL, A. H.: Search for new antibiotics, 82
Campbell, E. J. M. & Dickinson, C. J.: *Clinical physiology*, 264
Carbohydrate metabolism, action of insulin on, 224, 239
Carbomycin, pharmacology, 39
Carter, C. W., Coxon, R. V., Parsons, D. S. & Thompson, R. H. S.: *Biochemistry in relation to medicine*, 3rd ed., 264
Chemistry: *Heterocyclic chemistry*, 85
Chloramphenicol, action, 13
— chemistry, 4
— dangers of use, 68
— pharmacology, 38
— staphylococcal resistance, 74
Chlorpropamide therapy, clinical effectiveness, 257
— — selection of patients, 255
CLEMENTS, F. W.: Naturally occurring goitrogens, 133
Collins, D. H. (editor): *Modern trends in pathology*, 86
Contributors, notes on, 87, 170, 260
Corticotropins, chemistry, 191
— melanocyte-stimulating activity, 193
— species variations, 191
— structure and activity, 192
Coxon, R. V., *see* Carter, C. W., 264
Cretinism, endemic, and deaf-mutism, 92
— goitrous, sporadic, 113
CROFTON, J.: Chemotherapy of tuberculosis, with special reference to patients whose bacilli are resistant to standard drugs, 55
Crook, E. M. (editor): *Glutathione*, 262
Crops, goitrogens in, 134
CRUICKSHANK, R.: Laboratory uses of antibiotics, 79
Cycloserine, dangers of use, 70
— pharmacology, 37
D-Cycloserine, 3

Dawson, R. M. C., Elliott, D. C., Elliott, W. H. & Jones, K. M.: *Data for biochemical research*, 263
Deafness, association with thyroid dysfunction, 92
Diabetes mellitus: *Complete cookery book for diabetics*, 2nd ed., 262
— — *Diabetic ABC*, 12th ed., 262
— — *Home guide for the diabetic*, 262
— — relation to endocrine disorders, 243
6-Diazo-5-oxo-L-norleucine, 3
Dickinson, C. J., *see* Campbell, E. J. M., 264
Diguanides, hypoglycaemic, indications, 257
— — side-effects, 258
— — technique of therapy, 258
Diguanidines, chemistry, 251
Dihydrostreptomycin, pharmacology, 37
DONIACH, D., *see* ROITT, I. M., 152
DONIACH, I.: Types of thyroid growth, 99
DORMER, A. E.: Treatment of bacterial endocarditis, 61
Drug resistance and mechanisms for its development, 16
— — clinical problems, 73
— — heritability, 18
DUNLOP, D. M. & MURDOCH, J. McC.: Dangers of antibiotic treatment, 67

EAYRS, J. T.: Influence of the thyroid on the central nervous system, 122
Elek, S. D.: *Staphylococcus pyogenes and its relation to disease*, 85
Elliott, D. C., *see* Dawson, R. M. C., 263
Elliott, W. H., *see* Dawson, R. M. C., 263
Endocarditis, bacterial, treatment, 61
Endocrine disorders and insulin action, 242
Erythromycin, chemistry, 6
— dangers of use, 70
— pharmacology, 39
— staphylococcal resistance, 74
EVANS, W. H., *see* KITCHIN, F. D., 148
Exophthalmos, relation to thyroid-stimulating hormone, 129

Fatty acids, metabolism, influence of insulin on, 228
FISHER, R. B., Action of insulin on carbohydrate metabolism, 224
FOLLEY, S. J. & GREENBAUM, A. L.: Insulin and metabolism of fatty acids, 228
Francis, G. E., Mulligan, W. & Wormall, A.: *Isotopic tracers*, 2nd ed., 172
FRASER, R.: Endocrine disorders and insulin action, 242

GALE, E. F.: Nature of the selective toxicity of antibiotics, 11
GARROD, L. P.: Antibiotics in medicine: introduction to symposium, 1
— & SCOWEN, E. F.: Principles of therapeutic use of antibiotics, 23
Gear, H. S.: *World medical research: principles and practices*, 86
Glucagon, metabolism, 206
Glutathione, 262
Goitre, diffuse, toxic, genetic factors, 148
— endemic, and deaf-mutism, 93
— genetic factors, 149
— in children, epidemiological studies, 136
— sporadic, with deaf-mutism, 95
Goitrogens, natural, 133
GOOLDEN, A. W. G.: Use of radioactive iodine in the diagnosis of thyroid disorders, 105
GOULD, J. C.: Laboratory control of antibiotic therapy, 29
Graves's disease, thyroid-stimulating hormone in, 130
GREENBAUM, A. L., *see* FOLLEY, S. J., 228
Griseofulvin, chemistry, 6
— pharmacology, 40
Guanidine derivatives, hypoglycaemic, chemistry, 250
Gurr, E.: *Encyclopaedia of microscopic stains*, 263

HARINGTON, Sir C. R.: Thyroid gland: introduction to symposium, 89
HARRIS, I.: Chemistry of pituitary polypeptide hormones, 189
Hashimoto's disease, cytotoxic factor of serum in, 153
Heart disease, rheumatic, antibiotic prophylaxis, 49
Hexokinase theory of action of insulin on glucose utilization, 237
Histology: *Encyclopaedia of microscopic stains*, 263
Hypoglycaemic agents other than insulin, chemistry, 250
Hypoglycin A, chemistry, 253
Hypothalamus and thyroid, interactions, 165
Hypothyroid states, genetic factors, 148

Insulin, action, effect of endocrine disorders on, 242
— — mechanism of, 237
— — on carbohydrate metabolism, 224, 239
— — on utilization of glucose, 237
— antagonists, 214
— antibodies, 219
— assay, methods, 196
— chemistry, 183
— discovery, 179
— early history, 179
— early manufacture, 180
— effect on protein metabolism, 233, 240
— in blood, 209
— — — detection, 209
— — — estimation, 210
— — — levels in plasma or serum, 211
— — serum, chemical activity, 212
— influence on fatty acid metabolism, 228
— *Mechanism of action of insulin*, 262
— metabolism, 202
— reactions to, 249
— recent work on, 181
— substitutes, clinical effectiveness, 255
— therapy in clinical practice, 247
— — indications and contra-indications, 247
— — preparations available, 247
— — scope and limitations, 247
Iodine binding, 119, 120
— radioactive, use in diagnosis of thyroid disorders, 105
